CST-03 Red Team Operation

Red Teaming is the process of using tactics, techniques, and procedures (TTPs) to emulate real-world threats in order to train and measure the effectiveness of the people, processes, and technology used to defend environments. Built on the fundamentals of penetration testing, Red Teaming uses a comprehensive approach to gain insight into an organization's overall security in order to test its ability to detect, respond to, and recover from an attack.

Prerequisites:
1. CST-01 Fundamental Training

Outline:
Cyber Kill Chain
C2 Framework
Empire Framework
Privilege Escalation
Social Engineering
Data Exfiltration
Credential Dump
